

Performance check

Efficient & performance-oriented

KBA performance checks are a perfect way to guarantee your press is operating at its top performance capabilities. You will be impressed by the professional and thorough job by our team of experts.

They will come to your shop and observe the physical conditions of your presses. They then interview the press crew,

pressroom management, as well as maintenance personnel. After observing your press and staff in action the findings will be presented to your management team with recommendations, suggestions and any actions moving forward. This performance check is a great way to get back on track and get an outside perspective on areas of improvement.

Your benefits:

- Improvement of your printing performance
- Increase of printing quality
- Exploit the machine capacity
- Reveal of optimization potential
- Minimizing machine downtimes
- Reduction of costs by less waste sheets
- Optimizing processes
- Reasonable upgrades with short payback period
